## **New England Institute of Technology to Host 2019 Biodiesel Seminar**

### ***Other Seminar Locations Include Indiana, Pennsylvania and California***

East Greenwich, RI – Steven H. Kitchin, Vice President for Corporate Education and Training at New England Institute of Technology (NEIT), announced that the university will serve as one of four national host sites for the National Biodiesel Board's second annual Exploring Biodiesel (XBX) series. This one-day seminar, which is complimentary to attendees, is designed to educate diesel fuel distributors and end users on the benefits and opportunities surrounding biodiesel.

From both technical and practical standpoints, attendees will learn about the operational, environmental and cost benefits of biodiesel and how this market-ready, broadly adoptable, carbon-neutral renewable fuel can empower organizations across all sectors as state and federal carbon reduction policies take effect over the next 10 to 30 years.

**The Exploring Biodiesel XBX regional seminar will be held on Thursday, May 30, 2019, from 10:00 a.m. to 2:00 p.m., at New England Institute of Technology's East Greenwich campus located at One New England Tech Blvd.**

"We are pleased to collaborate with the National Biodiesel Board on its upcoming seminar," stated Kitchin. "For nearly 80 years, New England Institute of Technology has been at the forefront of developing workforce training solutions for companies, trade associations and organizations of all sizes and sectors. NEIT is proud to be chosen as one of the host sites where attendees will learn firsthand about the importance of utilizing biodiesel fuel."
