New England Institute of Technology Announces International Partnership with the Norwegian School of Creative Studies

WARWICK, RI, – Dr. Thomas F. Wylie, Provost and Senior Vice President at New England Institute of Technology, is pleased to announce that the college has recently formed an international partnership with the Norwegian School of Creative Studies, a design institute with six campuses throughout Norway.

By forming this partnership, interior design students who have completed a two-year program at the Norwegian School of Creative Studies will enroll in New England Institute of Technology’s Bachelor of Science degree in Interior Design Technology program. Students will study the fundamentals of interior design and building sciences through a combination of theoretical and practical concepts of design, building systems, components and construction. Advanced topics include finishes and materials, textiles, art history, estimating and scheduling, contracts and specifications, construction law, acoustics and lighting and interior construction documentation. Studio courses allow students the opportunity to incorporate their knowledge and skills in a practical application to include space planning, hospitality, commercial and institutional projects.

Wylie stated, “New England Institute of Technology is proud to be an international partner with the Norwegian School of Creative Studies. Not only will the Norwegian students benefit from studying abroad, New England Tech students, faculty and administration will be afforded the opportunity to learn from our Norwegian students. It will be a great learning experience for everyone.”

New England Institute of Technology, a private non-profit technical college, has an enrollment of over 3,300 students in more than 30 Associate, Bachelor and Master’s degree programs, and is accredited by the New England Association of Schools and Colleges, Inc. For more information, please visit New England Tech’s website at www.neit.edu.
