New England Institute of Technology Makes The Princeton Review List of “Top 50 Undergraduate Schools for Video Game Design”

EAST GREENWICH, RI – Dr. Douglas H. Sherman, Senior Vice President and Provost at New England Institute of Technology (NEIT), announced that the university has been named one of the *Top 50 Undergraduate Schools to Study Game Design for 2021* by The Princeton Review, one of America’s best-known education services companies. Since 2010, The Princeton Review has recognized both undergraduate and graduate schools with the best programs in game design. To review the rankings visit: <https://www.princetonreview.com/college-rankings/game-design>.

The data collected was based on a survey that The Princeton Review conducted in the Fall of 2020 of administrators at 150 institutions in the United States, Canada and abroad offering both undergraduate and graduate game design courses, majors, or degree programs. The 50-question survey collected information on topics from course offerings to the starting salaries of graduates. The selection and ranking of schools were based on criteria that included the quality of the curriculum, faculty credentials, facilities, technology and graduates’ career achievements.

“We are proud to receive this distinction from The Princeton Review,” stated Dr. Sherman. “Our faculty work closely with industry experts to ensure our curriculum incorporates the technical skills sought after by today’s employers. Our experiential approach to learning coupled with high tech gaming labs, expert faculty and engaging on-campus gaming events, NEIT students are well prepared to enter this exciting industry.”

For more information regarding NEIT’s Associate in Science and Bachelor of Science degree programs in Video Game Design and Game Development, contact the Admissions Office at 800-736-7744 or by email at Admissions@neit.edu. Complete program descriptions may be found at www.neit.edu.
